

OAK/MAPLE TUB SKIRT

WaterTech's cabinet grade Oak or Maple tub skirt is an excellent choice if a removable front access panel is desired. The skirt has a picture frame look that is easily installed with screws and wood plugs. Each skirt comes slightly oversized so the installer can cut or sand it if the opening is irregular. Installing a skirt can be accomplished by any do-it-yourselfer. Each skirt comes unfinished and can be stained or painted to match cabinets, millwork or even the tub itself. Should the pump or blower need service simply remove the wood caps and screw then remove the skirt. Tub models 6032Ultra, 7243 and 6043 require an additional 1" width for the skirt installation.

INSTALLER MUST PROVIDE FRAMING OR NAILERS IN THE TUB ENCLOSER TO ATTACH THE SKIRT. THE SKIRT CAN BE ATTACHED USING NAILS, SCREWS, OR ANY OTHER SYSTEM THE INSTALLER DESIRES.
